Due to change in the existing ITC framework. Hence, with a view to tune with new technology, the **CIS Entry Module developed** on open source technology using LAMP (Linux Apache MySql & PHP) by Pune NIC Technical Team and customized by Gujarat HC-NIC as per the requirements of Gujarat District Judiciary was initially implemented at two Court Establishments of City Courts on test basis. Meanwhile, the Information Technology in Gujarat Judiciary has been strengthened by implementation of E-Court Mission Mode Project by the E-Committee.

E-FILING

To capitalize the experience gained on successful implementation of “On Line Bail Application System”, this High Court plans to move one step ahead in computerization by implementing E-Filing.

Since the Office of the Government Pleader (OGP), a representative of State Government, is in the process of its computerization, this high court is plans to test the e-filing system with them. On success, this system can be extended to all the litigants/ stakeholders.

In the second phase, online court fee payment will be considered, in the process of e-filing without involving third party.

The software development is ready for implementation.
