Delhi High Court

Cadre of Technical Manpower for implementing e-Courts Project

Justice Sanjeev Sachdeva
Delhi High Court

The objective of Phase – II of the e-Courts project

- Create the required Information and Communication Technology (ICT) and support infrastructure for the Judicial System.
- All the essential and important Judicial and Administrative processes are to be computerized for the use of Judges, Record Keepers, Enquiry Officers, Filing Clerks, Account Officials, Official dealing with certified copies etc.

- The judgements/evidence are to be transcripted during the functioning of the court. Copy sent to the computer room of the court complex for uploading in the website and creation of a judgment database.
- Data related to the cases which are at various stages, issuance of summons, issues, evidence, hearing etc. are to be fed into a central database for easy accessibility.
- All the files from the filing stage onwards are to be digitized.

- The entire status / stage of the case is to be made available on the net for the litigants / citizens without referring to various documents / papers.
- Software is being developed to deal with fresh filing of cases, defect maintenance, court fee calculations, registrations, time limitation, etc.
- Distribution of judicial work/assignment of cases to the judges to be done electronically to avoid large amount of paperwork and file movements.

In phase III

- There has to be integrated digital document management system with digital inventory of files, properties, with digital signature
- Digital system integration is to be done with external entities like police, treasury, jail, Registration office, etc.
- The judicial system is to be upgraded so that data can flow seamlessly with other government entities.

Facilities are to be created so that the litigant, advocates, other agencies can interact with the judicial system electronically.

So where are we heading?

Nothing is permanent.

Change/progress is inevitable.

Lets take a walk down memory lane.....

YOU WOULD LISTEN TO THE RADIO ALL DAY LONG JUST TO RECORD YOUR FAVORITE SONG OF ALL TIME

ON A TAPE.

Post 473

There is nothing like a well packed working typewriter to make your day. I was shocked to find the orginal owners manual yellow with age and of course in German.

Also a picture from April 2008 when it was on display somewhere. There was no mention of the supporting documents in the listing and my low ball offer seems amazing that it was accepted now that I have it in front of me.

Of course there were some issues that may have seemed like a major overhaul was needed... at first the shift key would not shift... it was locked solid as were the keys themselves.

There are three locking levers that need to be positioned just so to unlock everything correctly...

I fear that I will have to put the manual in a sealed bag it will not hold up under much handleing.

I would say that someone took good care of this... looks like the carriage pull cord was replaced with fishing line sometime back... I am happy they did... since I have a working machine.

Serial number 121,916.

I have a book that tells me all the fonts as well...
this is: Perl-Druckschrift. Diese Schriftart (Zeichenabstand 2,23 mm).

After a close look the manual does not match up fully with this model but close enough.

GEE!
