**Technology offers courts a crucial commodity—information**

—that can help the justice agencies make better and quicker decisions, and track case outcomes

# Technology integration helps courts

Technology empowers courts:

- to meet core purposes and responsibilities, particularly when they work with limited court staff
- reduces hours of operation
- optimizes court locations

Pre-requisites to harness technology:

- Identify needs of judges, lawyers and litigants
- examine process re-engineering opportunities
- migrate from document to content management

This improves the quality of justice, access to justice, and public trust and confidence in the court as an institution

# E-Judiciary: Objectives of eCourts Mission Mode Project of India - 1

- To enhance judicial productivity both qualitatively and quantitatively, to make the justice delivery system affordable, accessible, cost-effective and transparent
- To make policy for managing case loads; for effective Court Management and Case Management System
- To provide efficient and time-bound citizen centric service delivery

# E-Judiciary: Objectives of eCourts Mission Mode Project of India - 2

- To provide interoperability and compatibility with National Court Management System, Inter-operative Criminal Justice System, National Legal Service Authority and other programmes to enhance the quantity and quality of the justice delivery system
- To develop, install and implement decision support systems in courts
- To automate the processes to provide transparency of information access to its stakeholders

# Court computerisation in India

- GOI with NIC's help has been computerising courts at all levels since early 1990s
- SC and all HCs had started using IT to some extent by the start of the millennium
- National Policy by eCommittee in 2005 launched eCourts Project for district courts
